Sobre o curso

ITIL 4 brings ITIL up to date in 2019 by revising many established ITSM practices and placing them in the wider context of customer experience, value streams and digital transformation, as well as embracing new ways of working, such as Lean, Agile and DevOps.

This module covers the 'core' service management activities and expands the current scope of ITIL to cover the 'creation' of services. This module focuses on the integration of different value streams and activities to create, deliver and support IT-enabled products and services whilst also covering supporting practices, methods and tools. This module will also cover service performance and will give practitioners an understanding of service quality and improvement methods. It will enable IT practitioners to continue to deliver innovative yet reliable tech-enabled services to their customers in an increasingly competitive market.

Why take this ITIL 4 Create, Deliver & Support training?

This course not only teaches you how value streams can be built and managed holistically, but also how continuous improvement iterations and feedback loops can be included in value streams. The course explores areas such as development, testing, knowledge, customer and employee feedback, new technologies, sourcing and ways of managing work.

Este curso e-learning inclui

- Conteúdos disponíveis 24/7
- Manual e o Exame de Certificação (online proctored)
- O curso oficial ITIL em e-learning tem a duração de 120 dias. No entanto, por forma a alcançar melhores resultados na aprendizagem, a GALILEU aconselha a realização do curso em **60 dias**. Para tal, o formando irá contar com:
